Smart Picking/Sortation System

# WHY IT MATTERS?

## PRODUCTIVE STORE SPACES

Effective sortation systems allow smaller lot sizes needed to replenish each store. Free-up back room storage space needed to carry excess stocks and convert to selling area.

## MAXIMIZE INVENTORY TURN-AROUND

Spark sortation system allows each store to order only what is needed which significantly improves stocks to sales position.

## SCALABLE GROWTH

Spark significantly improves cross-dock and batch picking process in distribution centers. Increase customer/store location using minimal preparation or staging area.

SPARK 

# FEATURE HIGHLIGHTS

## FASTER SORTATION

Significantly increases sortation process than any manual or paper-based process.

## SPACE SAVING

Helps organize shelves and space properly.

## REDUCE TIME FOR TRAINING

Training will only take hours, not even days or weeks.

## LOW OPERATIONAL EXPENSES

Only needs a few operators.  
Save on materials like paper that are required for manual processing.

## BETTER ACCURACY

Improves picking method and reduces mispicked items.

# SMARTPICKING /SORTATION SYSTEMS

A light-directed module lights up at where the item needs to be placed to complete the order. Sorters place the items and then confirms the order by switching off the light-directed

# S P A R K

In this generation, most customers expect their orders to be in their homes in hours or a few days. Spark allows you to serve the orders earlier than having to process manually.

As your business grows rapidly, Spark can help your business solve your customers' demand.

**In each business, there is a process, or a delivery system or information system, that is changing rapidly under them.**

- Simon Sinek
